Configure Widget Settings

Update your website
settings and widget
preferences.

The screenshot shows a 'Configure Settings' dialog box with a light gray background. It features three rounded rectangular buttons stacked vertically. The top button is orange with the text 'Configure Settings' in white. The middle button is white with an orange border, containing a copyright symbol icon and the text 'Copy Embed Script'. The bottom button is also white with an orange border, containing a copy icon and the text 'Copy iFrame Embed'.

Helpful Decision Guide

1

- ✎ I want to share a promotion or announcement without interrupting visitors.

Use: Horizontal Banner

Best for sales, announcements, and time-sensitive updates that stay visible but unobtrusive.

2

- ✎ I want to display a quick message that pops up briefly.

Use: Popup

Ideal for short alerts, reminders, or notices you want visitors to see right away.

3

- ✎ I need visitors to stop and read an important message.

Use: Modal

Best for confirmations, critical notices, or messages that require user attention before continuing

4

- ✎ I want information to scroll across the screen continuously.

Use: Ticker

Perfect for rotating updates, news, event reminders, or ongoing announcements.

5

- ✎ I want a bold, high-impact message that fills the screen.

Use: Full Screen

Great for major announcements, promotions, maintenance notices, or a landing-page-style message.

6

- ✎ I want more control over size, animation, or behavior.

Use: Advanced Features

7

- 💡 **Tip: Start simple. You can always switch widget types later—no content is lost.**
